Parth Panchal

Assisstant System Engineer
+91-9892764193 | parthp2172@gmail.com | Github | Mumbai

Summary

Assistant System Engineer with experience supporting enterprise Oracle Cloud Infrastructure (OCI) environments. Skilled in Linux system administration, cloud operations, infrastructure automation, server hardening, backup & recovery, and production support. Committed to delivering reliable, secure, and efficient cloud infrastructure through continuous learning and automation.

Skills

Operating Systems: Red Hat Enterprise Linux, Oracle Linux, Ubuntu, CentOS
Cloud: OCI, Networking, Storage, IAM, Load Balancers, Backup Policies, Compute Instance Provisoning
Automation & Scripting: Ansible, Shell Scripting
Linux: Server Hardening, Patch Management, Backup & Recovery, Incident Handling, NFS, LVM, Red Hat Enterprise Linux (RHEL), Oracle Linux, Ubuntu Linux, Package Management, Firewall Management, Process Management, User & Group Management, Permission Management, Storage Management, Filesystem Management

Work Experience

Tata Consultancy Services *August 2024 – Present*
Assistant System Engineer *Mumbai*

- Managed and supported 1500+ Linux servers hosted on Oracle Cloud Infrastructure (OCI), maintaining 99.5%+ uptime across production and non-production environments.
- Administered OCI networking services including VCNs, Subnets, Route Tables, Security Lists, Network Security Groups (NSGs), Internet Gateways, Service Gateways, and Load Balancers, ensuring secure and reliable connectivity between cloud resources.
- Worked extensively with OCI storage services including Block Volumes, Boot Volumes, Object Storage, File Storage Service (FSS), NFS, and LVM, optimizing storage allocation, performance, and capacity utilization.
- Provisioned and configured OCI compute instances, storage resources, and network components, reducing infrastructure deployment time from several hours to less than one hour through standardized build procedures.
- Designed and implemented Ansible-based automation for Linux patching, user management, and routine administrative activities, reducing manual effort by approximately 40%.
- Performed Linux system administration tasks including server hardening, kernel updates, patch management, user access management, performance tuning, and vulnerability remediation across enterprise environments.
- Configured and managed backup and recovery solutions using OCI Backup Services ensuring data protection and recovery readiness for critical workloads.
- Participated in Disaster Recovery (DR) drills and failover testing activities, validating backup integrity, recovery procedures, and business continuity readiness for production environments.
- Implemented OCI resource tagging, monitoring, and governance practices, improving infrastructure visibility, asset tracking, and operational efficiency across cloud environments.
- Troubleshoot and resolved production incidents involving network connectivity, storage performance, boot failures, filesystem issues, and server availability, ensuring adherence to operational SLAs.

Education

Saraswati College Of Engineering *India*
BE in Computer Science Engineering (AIML) | ***8.6*** *2020 – 2024*

VPM Junior College *India*
Class XII | ***77.23%*** *2019 – 2020*

Wema English School *India*
Class X | ***87.80%*** *2017 – 2018*

Achievements

- Built automation scripts that reduced repetitive manual tasks, saving ∼8–10 hours per week.
- Supported patching and maintenance activities for large-scale infrastructure with minimal service disruption.
- Improved operational efficiency through automation and standardization of routine processes.

Certifications

- **Oracle Cloud Infrastructure 2025 Certified Architect Associate** - Oracle | Jul 2025 | Link
- **Oracle Cloud Infrastructure 2025 Certified Foundations Associate** - Oracle | May 2025 | Link
